

We have very exciting news about the Patient Portal at Plateau Pediatrics! We are going to be transitioning to a new platform very soon – hopefully in just the next couple of days. We want you to know that we will keep this as seamless and painless for you as possible! We will alert you again by email and by social media when the new portal invitations are being sent out. **Please note that the current portal will remain in place for the time being, during the transition to our new Portal.**

When these are ready to roll out, you will be receiving a notification by email from <https://patientportal.intelichart.com>. It might look something like “no-reply@patientportal.net”. When you receive this, it will prompt you to complete the registration process. There will be a link that you can simply click. There is a PIN number associated with this email.

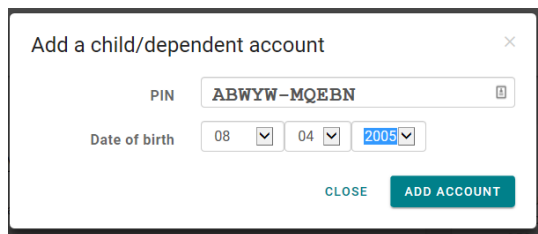

The portal will look like this and you will simply follow the prompts to set up your account by entering the information of your child (or for yourself if you’re 18 and up).

If you already have a login to our new Patient Portal under this email address (for example, you have already registered one child and you’re now entering a sibling), click the “login” tab and log in. You will then enter under “My Account” (in the upper right) and click “Add Child / Dependent”.

From there, you will then be able to enter the additional child(ren) information as such according to the PIN information received in the subsequent email.

Again, please note that the current portal will remain in place for the time being, during the transition to our new Portal. As always, if you have any questions at all, please call Susan or Villa at (931) 707-8700. We appreciate you and wanted you to be looking forward to your new email in the coming days for the exciting Patient Portal transition!
